Recalls	1	Mislabeling/alcohol contamination	2025
Warnings	1	High caffeine content	Ongoing

## Key Notable Examples

### Lawsuits:

- \$7.8 M class-action settlement (2024) over "no preservatives" claims when citric acid present (status: Settled)

Sources: <https://topclassactions.com/lawsuit-settlements/consumer-products/judge-gives-7-8m-celsius-settlement-over-false-preservative-advertising-final-approval/>

### Recalls:

- High Noon vodka seltzer cans mislabeled as Celsius Astro Vibe Blue Razz, 10-state recall (scope: 10 states)

Sources: <https://www.fda.gov/safety/recalls-market-withdrawals-safety-alerts/high-noon-announces-recall-its-vodka-seltzer-beach-pack-12-packs-due-inclusion-celsius-astro-vibe-tm>

### Warnings:

- 200 mg caffeine per can; not advised for minors, pregnant/nursing women, or caffeine-sensitive users

Sources: <https://www.celsius.com/essential-facts/>

## Risk Implications

- Caffeine (200 mg) can cause anxiety, insomnia, elevated blood pressure
- No direct health risks reported for Tropical Vibe flavor itself

## Recommendations

- Healthy adults limit to  $\leq 2$  cans/day; avoid if caffeine-sensitive
- Check lot codes if purchasing Astro Vibe Blue Razz to confirm recall status

Methodology: Publicly available lawsuits, recall databases, and regulatory warnings reviewed via deep search.
